

HSE in Bravida

(Health, Safety and Environment)

In Bravida we practice a zero-philosophy, meaning that our goal is to avoid any damage to persons or equipment. We will work actively to prevent all accidents and damage, and to establish a positive company culture by:

- Always give priority to safety in all our work
- Communicate our safety goals to clients, employees and suppliers
- Involve all employees in our HSE work – we are all responsible for reaching our targets
- Give priority to a healthy and safe working environment
- Provide clear instructions for our everyday safety work, – and the required tools to reach our goals
- Systematically follow up and analyse our results, for a continuous improvement of our routines and working habits
